

Holiday Golf

Simulators

Golf for the 21st Century!

If you have room to swing a golf club, we can install a simulator for you!

Holiday Golf gives you a complete, easy to operate, multimedia golf simulator for year round course play, instruction and entertainment. Whether it's giving the most meaningful lessons possible, playing beautiful golf courses, or reclining in front of the huge screen to watch movies or sporting events, Holiday Golf simulators are perfect for the year round facility. Holiday Golf integrates all aspects of a golfer's game in an easy to understand format that can be recorded for future review.

Holiday Golf's Silent Screen™ greatly reduces noise from the ball striking the screen and is made to last through many thousands of golf ball impacts. There is no ball bounce back and no center seam in the Silent Screen™.

Size and Portability

If portability is important to you, the Holiday Golf System 4™ Simulator can be taken down and set up quickly for private parties, shows and other events.

Recommended installation area is 10' H x 15' W x 22' L

For home installations, if you do not have room for our standard cage, we can customize a carpeted wall and ceiling combination for you as seen at left. Fits in an area as small as 10' wide x 18' long x 9 1/2' high

Choose from two console types:

- Touch Screen Monitor with Pedestal
- Computer cabinet with Touch Screen Membrane Keypad and Fold Up Keyboard Tray

Both have easy to use menu screens

18 Hole Course Play Designed for Your Success

Play 18 hole golf courses just like you would outdoors. Drive, chip and putt real golf balls into our large projection screen. Balls fly down the fairway or roll across the green with amazing realism. The realistic ball flight detection allow golfers to hit hooks, slices, draws, fades and arrow-straight shots. The ball reacts with images on the screen, disappearing behind hills, rolling down slopes and bouncing off trees. This makes play fun and realistic on some of the finest, and most challenging championship golf courses from around the world.

Fun Games

Special events such as long drive, closest to the pin, skins and scramble are all standard on every **Holiday Golf Simulator**. Even if you have a high handicap or are just starting to play, you can compete against a scratch golfer by playing the same hole from different distances. Each game can be competitively equal for any level of player. We also offer a league play feature for multiple round competitions.

The Skins Game		
Renditions Golf Course		
Golfer	Skins	Earnings
Brian	1	20000
Kirk	0	0
Next hole =		1 20000

Reference to earnings is FICTITIOUS

Home Entertainment

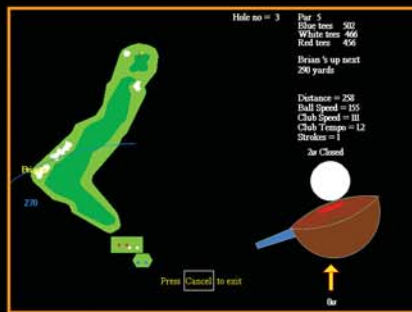

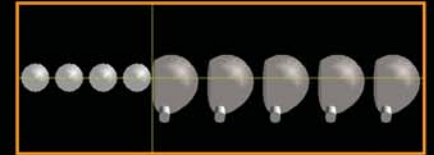

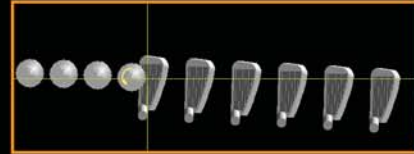

Your golf simulator can be used as a large screen TV to watch sports, your favorite TV shows, or connect an Xbox, Wii or Playstation video game system for an incredible gaming experience.

We can also provide other additional options such as a hunting simulator, flight simulator, or a race car simulator complete with steering wheel, pedals and seat.

Holiday Golf's True Swing Analyzer™

Our True Swing Analyzer™ with 115 optical sensors is highly accurate and very user friendly. It images the entire club head (not just the toe) as you swing through and hit the ball, then measures the ball and club head speed, launch angle, ball spin and ball side spin. This allows the golfer to see the club head, swing tempo, swing path and the club face angle with impact points as the club strikes the ball.

After a swing, the data is gathered by the True Swing Analyzer™ which dynamically displays all of your swing details. A driver head or iron is shown, depending on the club used. This screen can be automatically displayed during play or called back with a single keystroke for review. Your swing data is displayed in three ways; swing graphics, static, and textually.

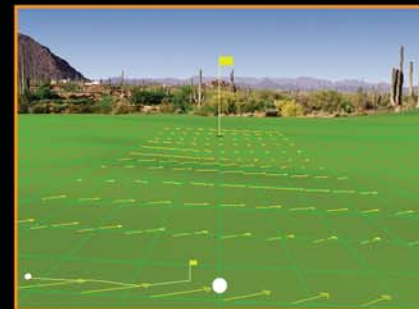

Target Based Driving Range

Every good golfer knows the importance of driving balls to a target instead of just blindly swinging through the ball. Our simulator allows you to practice like you would on an outdoor range. Just select your distance from the pin and practice dropping those tough iron shots onto the green. You can practice from 10 to 250 yards in 10 yard increments to a green or on an open range.

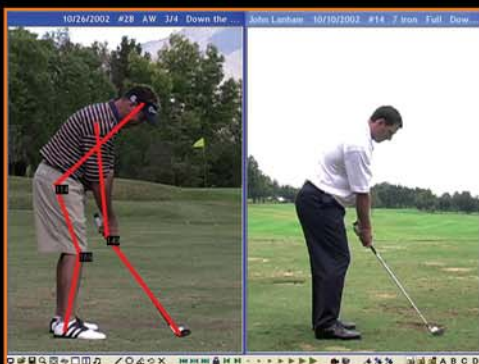

On-Screen Putting

Holiday Golf offers 3 different putting options during play: automatic putting, manual putting, and on-screen putting. With on-screen putting, the actual green is simulated using state of the art measuring and rendering techniques showing the undulations and breaks of the green. The golf ball rolls and breaks just as it would on a real green.

True Vision Video Analysis™

Computerized video analysis makes your Holiday Golf simulator a total learning environment for year round instruction, personal training, and club fitting. The image quality is unsurpassed and the 30 frame-per-second playback ensures that you don't miss anything in the swing. Built in drawing tools let you highlight swing flaws, while the comparison feature lets you see how you measure up to your favorite pro. Teaching on the Holiday Golf simulator is easy and effective. Feedback is immediate and the student sees instant results from following the instruction. Add notes for later review and see your swing in sequence. Compare two to six golfers side by side at one time. Switch a left handed golfer to a right hand view for easy side by side comparison.

Play Beautiful Courses from Around the World

A small sample of some of our courses.

Edgewood Tahoe

This well known course lies along the edge of the vast and beautiful Lake Tahoe. Located in Lake Tahoe, Nevada. Designed by George Fazio.

Teeth of the Dog

With 7 holes by the ocean, the fabulous Teeth of the Dog course is a world top 20. Located in the Dominican Republic. A Pete Dye Creation.

Grey Wolf

Golf amongst the pine trees in the scenic Canadian Rockies. Rated top 10 of Canadian courses. Located in British Columbia.

Troon North

The Hallmark of the desert golf experience. Pure. Desert. Classic. Located in Scottsdale, Arizona. Designed by Tom Weiskopf and Jay Morrish.

Choose from courses famous for their natural beauty and playability. High resolution photographs, projected onto the simulator screen present the golf courses in brilliant color for the most realistic play possible.

We also include 12 GPS 3D computer generated virtual courses with amazing graphics including hole fly-bys and full ball flight. Full swing analysis is displayed with each stroke. These courses include St. Andrews Old Course and Pebble Beach. Over 50 additional GPS courses are available..

System 4™ Simulator

The world's most realistic and educational golf simulator. The large, durable projection screen displays courses in stunning color, making you feel like you are playing the real 18 hole course. Drive, chip and putt real golf balls with your own clubs into the large projected image of the course.
